

IV62 eGX

BVC

INDUSTRIAL VACUUM CLEANER

5 YEAR
WARRANTY

- Heavy duty machine designed for long life
- Unique HONDA eGX battery electric motor
- Proven BVC YP3 multistage vacuum pump
- Up to 1hr run time per charge
- Swappable battery for continuous operation
- Heavy duty frame and casters
- Disposable bag collection
- Suitable for fine dust and hazardous dust
- Variable speed operation
- 51mm inlet with adapter to 38mm
- Motor and battery/charger rated IP55
- Wide range of tools including high-reach
- *3 year HONDA warranty on motor

BVC – The Original British Vacuum Cleaner
Tough Machines for Tough Jobs

New to the BVC Range:- Zero-Emission Battery Power

BVC

The new BVC IV62 eGX eliminates trailing leads making cleaning possible in occupied public areas.

The BVC IV62 is powered by the unique Honda eGX engine. This is an advanced electrified power unit that accommodates the needs of the machinery market to enable equipment to be more compatible with usage environments that are considered difficult for either corded electrical or engine-powered machines, such as indoor work environments and other areas where low noise and the absence of trailing leads is important.

The vacuum pump on the IV62 eGX is the proven BVC YP3 multistage industrial exhauster designed for continuous duty in demanding industrial applications.

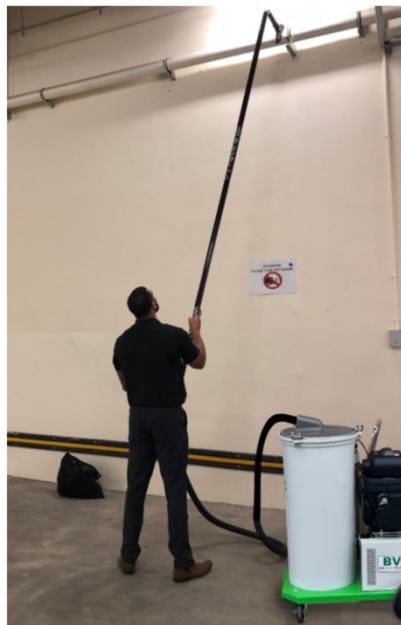

IV62 eGX as standard is fitted with a dry collection drum containing a combined microfibre bag and disposable bag filter plus HEPA filter.

Options include wet collection, M&H Class and drop-tank solutions.

IV62 eGX may be used with the complete range of 38mm and 51mm hoses and toolkits. High level carbon fibre cleaning kits are available.

Airflow at Maximum Power	Vacuum at Maximum Power	Airflow at Minimum Power	Vacuum at Minimum Power	Length x Width x Height	Weight
72l/s	1500mmH ² O	37l/s	400mmH ² O	980 x 635 x 1,100mm	86KG
